dopdf Engineering Test Document

High-Fidelity Document Architecture & Benchmark Suite

1. Executive Overview and Structural Integrity

This document is a synthetic test fixture generated to evaluate text extraction, styl
ing hierarchy, and vector layout fidelity in client-side document conversions. dopdf prese
rves bold, italic, and hierarchical typography across transitions into Microsoft Word OpenXML (.docx) and spreadsheets.

- Point Alpha: Client-side in-memory zero data retention guarantee.
- Point Beta: High-efficiency object stream compression & downscaling.
- Point Gamma: Full RTL and Unicode typography rendering via browser engines.
